TERRANOVA AGRO

Hydroponic Tower with grow lights

7 LEVELS

28 growing spaces

Integrated **lighting system**

Clean & smart growing

The smart, space-saving solution for growing fresh produce at home. Perfect for balconies, backyards, and apartments, this 7-level hydroponic system uses up to 95% less water and features specialized grow lights that support photosynthesis and healthy plant growth. Grow lettuce, spinach, herbs, strawberries, and more, all year round, without soil and with minimal maintenance.

TERRANOVA

Space-saving design
Smart 3D modular design, perfect for homes, balconies, and greenhouses.

Higher yields, less water
Boost crop yields by up to 35% while saving up to 95% of water with an efficient closed-loop drip irrigation system.

Clean & smart growing
Sistema sin tierra con circulación de agua automática y temporizador; mínimo mantenimiento.

Safe & durable materials
Made from food-grade ABS/PP plastic. BPA-free, non-toxic, and built to last.

High-efficiency pump
Keeps nutrient-rich water flowing continuously, preventing stagnation.

Scalable modular design
Easy, tool-free assembly. Connect multiple towers to a shared water reservoir for larger commercial growing systems.

What can you grow & where?
Grow fresh vegetables, herbs, and small fruits in compact spaces. Enjoy clean, pesticide-free growing on patios, balconies, or in apartments all year round.

TECHNICAL SPECIFICATIONS			
Growing levels	7 levels	Germination sponge pad	1 piece
Growing spaces	28 spaces	Top cover	1 piece
Growing hole diameter	50 mm	Water reservoir	30 L
Base diameter	53 cm	Water pump	18 W
Overall height	135 cm	Water circulation system	1 set
Material	ABS / PP	Seedling tray	1 piece
Grow light power	64 W	Integrated lighting system	1 set
