TERRANOVA AGRO

Hydroponic Tower
9 LEVELS

36 growing spaces

3D modular design

Clean & smart growing

The smart, space-saving solution for growing fresh produce at home. Perfect for balconies, backyards, and apartments, this 9-level hydroponic system uses up to 95% less water while allowing you to grow lettuce, spinach, herbs, strawberries, and more. Enjoy fresh, soil-free harvests all year round with minimal maintenance.

TERRANOVA

Space-saving design
Smart 3D modular design, perfect for homes, balconies, and greenhouses.

Higher yields, less water
Boost crop yields by up to 35% while saving up to 95% of water with an efficient closed-loop drip irrigation system.

Clean & smart growing
Sistema sin tierra con circulación de agua automática y temporizador; mínimo mantenimiento.

Safe & durable materials
Made from food-grade ABS/PP plastic. BPA-free, non-toxic, and built to last.

High-efficiency pump
Keeps nutrient-rich water flowing continuously, preventing stagnation.

Scalable modular design
Easy, tool-free assembly. Connect multiple towers to a shared water reservoir for larger commercial growing systems.

What can you grow & where?
Grow fresh vegetables, herbs, and small fruits in compact spaces. Enjoy clean, pesticide-free growing on patios, balconies, or in apartments all year round.
